DENTAL EDUCATION

The Dental Education Program at Mount Wachusett Community College provides students with the opportunity to earn a Dental Assisting Certificate or an Associate Degree in Dental Hygiene. Upon completion of either program, students are prepared for positions in various healthcare settings. During the course of study, students will develop skills and competencies to prepare for state and national licensure Exams.

DENTAL HYGIENE DEGREE (DHY) (DAY ONLY) (SELECTIVE)

The registered dental hygienist is the member of the dental health care team who provides preventive oral health care services, including oral prophylaxis, dental health education, dental x-rays, nutritional counseling, dental sealants, preliminary examinations, and other preventive measures in dentistry. Students will take the National Dental Hygiene Board Examination and The Commission on Dental Competency Assessments (CDCA) Clinical Examination upon successful completion of the Dental Hygiene program. The Dental Hygiene program is accredited by the Commission on Dental Accreditation and has been granted the accreditation status of “approval without reporting requirements.” The Commission is a specialized accreditation body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, at the commission's web address (http://www.ada.org/100.aspx), or at 211 East Chicago Ave., Chicago, Illinois 60611.

Prerequisite Semester

| ENG 101 | College Writing I | 3 |
| MAT 126 | Topics In Mathematics | 3 |
| BIO 203 | Anatomy and Physiology I (formerly BIO 199) | 4 |
| BIO 204 | Anatomy and Physiology II | 4 |

Year 1

Fall

| BIO 205 | Microbiology | 4 |
| DHY 101 | Anatomic Science For The Dental Hygienist I | 3 |
| DHY 102 | Dental Hygiene Process Of Care I | 5 |
| DHY 103 | Dental Radiology | 3 |

Spring

| DHY 105 | Anatomic Science For The Dental Hygienist II | 3 |
| DHY 106 | Dental Materials | 3 |
| DHY 107 | Periodontology | 3 |
| DHY 108 | Dental Hygiene Process Of Care II | 6 |

Summer

| DHY 205 | Pain Control | 3 |
| ENG 102 | College Writing II | 3 |

Year 2

Fall

| PSY 105 | Introduction To Psychology | 3 |
| DHY 201 | Oral Pathology | 2 |
| DHY 202 | Pharmacology For The Dental Hygienist | 3 |
| DHY 203 | Dental Hygiene Process Of Care III | 5 |

Spring

| DHY 209 | Community Oral Health | 4 |
| DHY 207 | Dental Hygiene Process Of Care IV | 5 |
| DHY 208 | Dental Ethics And Professional Issues | 2 |
| SOC 103 | Introduction To Sociology | 3 |
| Humanities Elective | 6 |

Total Credits: 80

1 Recommended completion prior to program application
2 DHY 101 Anatomic Science For The Dental Hygienist I, DHY 102 Dental Hygiene Process Of Care I and DHY 103 Dental Radiology must be taken concurrently.
3 DHY 105 Anatomic Science For The Dental Hygienist II, DHY 106 Dental Materials, DHY 107 Periodontology and DHY 108 Dental Hygiene Process Of Care II must be taken concurrently.
DHY 201 Oral Pathology, DHY 202 Pharmacology For The Dental Hygienist, DHY 203 Dental Hygiene Process Of Care III must be taken concurrently

DHY 207 Dental Hygiene Process Of Care IV, DHY 208 Dental Ethics And Professional Issues, DHY 209 Community Oral Health must be taken concurrently

Humanities Electives: See Elective Courses by Abbreviation (http://catalog.mwcc.edu/electivecoursesbyabbreviation).

See Dental Education program student learning outcomes and technical standards.

**Application deadline**
The application deadline is February 1. This selective enrollment program requires additional application components. The selection process is competitive and space is limited.

**Requirements for consideration**
Applicants must meet certain academic standards. See the Selective Program Requirements (http://catalog.mwcc.edu/admissions/selectiveprogramrequirements) of the college catalog for specific details or refer to the program application available on the MWCC website or through the admissions office. Prior to admission, prerequisite courses needed are:

1. Not MAT 140 Elements Of Mathematics I

**Campus**
The Dental Hygiene Program is offered at the Fitchburg campus only.

**Helpful hints**
Because of an extensive classroom/clinical commitment, students are encouraged to complete some of the general education requirements prior to beginning dental hygiene courses.

Technology is integrated into all aspects of attending college in the 21st century. Students are expected to have proficient computer skills and the ability to access the internet via desktop/laptop computer or tablet. Internet access may be from home or through a public site such as a local public library, public college or at any Mount Wachusett Community College campus.

**Transfer options**
For transfer options, please click here (http://catalog.mwcc.edu/academicresources/#transferinformationtext). It is recommended that you also consult with your academic advisor.

**Special requirements**
Students seeking to participate in the dental hygiene program may be subject to meeting additional technical standards and requirements, which may include immunizations, CPR certification, liability insurance, a Criminal/Sexual Offender Records Information (CORI/SORI) check, fingerprinting, and drug testing. Some of these may be done at the student’s expense. (See Selective Program Requirements (http://catalog.mwcc.edu/admissions/selectiveprogramrequirements).)

All BIO, MAT (prerequisite) and DHY courses require a minimum grade of C+ or better to be eligible for promotion to the next level. Also BIO 203 Anatomy and Physiology I (formerly BIO 199), BIO 204 Anatomy and Physiology II, and BIO 205 Microbiology must be completed no more than ten years prior to the program’s application deadline.

**Career options/Earning potential**
For career options, please click here. (https://mwcc.emsicareercoach.com/#action=loadSearchResults&Search=dental +hygiene&SearchType=occupation)
DENTAL ASSISTING CERTIFICATE (DAC)

The duties of a dental assistant are among the most comprehensive and varied in the dental office. The dental assistant performs many tasks requiring both interpersonal and technical skills including: assisting the dentist during a variety of treatment procedures; taking and developing dental radiographs (X-rays); taking impressions of patients’ teeth for study models; providing patients with instructions for oral care following surgery or other dental treatment procedures; serving as an infection control officer and preparing and sterilizing instruments and equipment; and office management tasks such as record keeping, billing, inventory control, scheduling and reception duties. Students are eligible to sit for the Dental Assisting National Board Examination (DANB) upon successful completion of the Dental Assisting program. The program in dental assisting is accredited by the Commission on Dental Accreditation and has been granted the accreditation status of “approval without reporting requirements”. The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, at the commissions's web address (http://www.ada.org/100.aspx), or at 211 East Chicago Ave., Chicago, Illinois 60611.

Total Credits: 42-43

1 BIO 203 ANATOMY AND PHYSIOLOGY I (FORMERLY BIO 199) AND BIO 204 ANATOMY AND PHYSIOLOGY II MAY BE TAKEN IN PLACE OF BIO 152 ESSENTIALS OF ANATOMY AND PHYSIOLOGY. GRADE MUST BE A C+ OR BETTER.

2 The clinical rotation may be scheduled during daytime office hours

See Dental Education program student learning outcomes and technical standards.

Requirements for consideration

Student must achieve a C+ or better and maintain in sequence with all coursework. Students are required to earn a C+ or better in four prerequisite courses before taking DAC courses: BIO 203 Anatomy and Physiology I (formerly BIO 199), ENG 101 College Writing I, MAT 126 Topics In Mathematics, and PSY 105 Introduction To Psychology.

Campus

The Dental Assisting Program is offered at the Fitchburg campus only.

Helpful hints

Technology is integrated into all aspects of attending college in the 21st century. Students are expected to have proficient computer skills and the ability to access the internet via desktop/laptop computer or tablet. Internet access may be from home or through a public site such as a local public library, public college or at any Mount Wachusett Community College campus.
Transfer options
This program is intended for immediate career entry. Courses completed as part of this certificate program can be applied to the Dental Hygiene Degree.

Special requirements
Students seeking to participate in the dental assisting program may be subject to meeting additional technical standards and requirements which may include immunizations, CPR certification, liability insurance, a Criminal/Sexual Offender Records Information (CORI/SORI) check, fingerprinting, and drug testing. Some of these may be done at the student’s expense.

All BIO, MAT, and DAC courses require a minimum grade of C+ or better to be eligible for promotion to the next level.

Gainful Employment Program Disclosure Information
For gainful employment information, please click here (http://mwcc.edu/gedt/dac).

PROGRAM STUDENT LEARNING OUTCOMES FOR DAC

Upon graduation, students completing the certificate program in Dental Assisting would be expected to have the following competencies:

• Communicate effectively and accurately through oral, written and electronic means.
• Demonstrate the application of theory to practice in achieving optimal patient care.
• Practice within the legal, ethical and regulatory framework of dental assisting in accordance with the standards set by the State Practice Act and Code of Ethics for Dental Assistants.
• Demonstrate a commitment to the dental assisting profession through assuming responsibility for lifelong learning and professional growth.

PROGRAM STUDENT LEARNING OUTCOMES FOR DHY

Upon graduation from this program students shall have demonstrated the ability to:

• Communicate effectively and accurately through oral, written and electronic means.
• Apply theory to practice in achieving optimal patient care.
• Use methods of scientific investigation in developing a comprehensive plan of care.
• Implement comprehensive education plans that promote health and identify risk behaviors in individuals and groups of patients for both community and clinic settings.
• Practice within the legal, ethical and regulatory framework of dental hygiene in accordance with the standards set by the State Practice Act and Code of Ethics for Dental Hygienists.
• Commit to the dental hygiene profession through assuming responsibility for lifelong learning and professional growth.
TECHNICAL STANDARDS ¹ FOR DHY AND DAC

For general information about technical standards and accommodation, see Technical Standards. (http://catalog.mwcc.edu/academicresources/academicandgradingpolicies/technicalstandards)

Students entering these programs must be able to have/demonstrate the ability to:

• Comprehend textbook material at the 11th grade level.
• Communicate and assimilate information in either printed, signed or computer voice format.
• Gather, analyze, and draw conclusions from data.
• Have the visual acuity with corrective lenses to identify changes in oral tissues.
• Discern changes in color, texture and shape of tissues. Ability to differentiate among subtle shades of gray as seen on radiographs.
• Have sufficient physical ability to perform cardiopulmonary resuscitation in the handling of a medical emergency.
• Have sufficient communication (oral and/or written) ability to question the patient about his/her medical condition and to relay information about the patient to others in English.
• Have sufficient manual dexterity with two hands to manipulate instruments with precision and control in the oral cavity without causing damage to tissues. This skill may not be fully evaluated until the preclinical portion of the curriculum.
• Have a sense of touch that allows for assessment and palpation of oral tissues.
• Sit for prolonged (up to four hours) periods of time.
• Operate and manipulate mechanical equipment, e.g.: dials, switches, push buttons, syringes, and blood pressure measurement devices.
• Pick up items of very small (2mm in width, 21 mm in length minimum) and varying diameters.
• Use upper body movements (up to five feet) to grasp, push/pull, reach overhead equipment, and to rotate and reach laterally.
• Lift, carry, and move equipment and supplies up to 10 pounds.
• Wear protective equipment such as gloves, face masks, face shields, and protective eye wear.

DAC 101. Dental Assisting. 3 Credits.
This course provides an introduction to organized dentistry and the fundamentals of dental practice. The roles and qualifications of dental health care members according to the state dental practice act, an exploration of the dental specialties and assisting a dentist chairside will be the focus of the instruction. A comprehensive review of the skill sets needed for competency in four and six handed dentistry will include providing instrument transfer, a clear operating field through proper lip and tongue retraction, use of high volume evacuation and properly adjusting the light. Identification and knowledge of instrument use as each relate to a dental procedure will be a foundation for anticipatory chairside abilities. Laboratory and clinical sessions will also provide instruction and practice in supportive techniques such as placement of the rubber dam and matrix bands, charting and recording an oral exam, and sterilization and aseptic techniques. Exposure control, OSHA regulations, and hazard control recommendations will be introduced and reinforced throughout the course. Prerequisites: Current CPR certification, ENG 101, MAT 126 and BIO 152 or BIO 203 and BIO 204 with a C+ or higher. Fall.

DAC 102. Dental Science I. 4 Credits.
This course will introduce the student to oral embryology and histology, anatomy of the head and neck with a focus on oral anatomy, tooth morphology, and individual tooth identifications. The second half of the course will focus on microbiology, disease transmission and infection control. Learning opportunities will be offered in the form of lecture and demonstration, with the aid of anatomical models and extracted teeth so that the student will be prepared to identify individual structures of the mouth in preparation of lab and clinical experience. Prerequisites: Current CPR certification, ENG 101, MAT 126 and BIO 152 or BIO 203 and BIO 204 with a C+ or higher. Fall.

DAC 104. Practice Management. 2 Credits.
This course provides an introduction to basic practice management skills, business operating systems and financial management in a dental office. The components of the business operating system of an office will be introduced as will the skills needed in the financial management of an office. Prerequisites: Current CPR certification, DAC 101, DAC 102. Spring.

DAC 105. Dental Science II. 4 Credits.
This course will introduce oral pathology including diseases, lesions, conditions and disorders of the oral cavity followed by an investigation of caries and periodontal disease and the etiology, risk assessment and preventive measures for them. Pharmacology and the Management of Emergencies will be covered in the later part of the course. The student is provided with information and practice opportunities in dental and medical emergencies. Prerequisites: Current CPR certification, DAC 102. Spring.
DAC 110. Prevention. 3 Credits.
This course provides an introduction to Preventive Dentistry. The components of a comprehensive preventive program will include knowledge and theory of the roles nutrition, patient education, plaque control therapy, fluoride therapy and sealants have in preventive dentistry. Theory and practice are combined in such a way that the student is afforded the opportunity to learn didactic material, practice and manipulate on topical mannequins and then synthesize this learning by using peer partners. The student will be required to state the rationale and demonstrate proper technique for each preventive dental skill. Prerequisites: Current CPR certification, DAC 101, DAC 102. Spring.

DAC 115. Clinical Rotation. 7 Credits.
This course is integral for the student dental assistant to develop the functions introduced in the curriculum from a level of minimal competence to one of optimum proficiency. During this immersion experience students will rotate through two dental practices actively assisting and participating in patient care. A daily record of professional activities, including each clinical procedure assisted in and performed, and supportive lab and office procedures will be kept and provided for the course instructor to read and respond to. Seminars will be conducted weekly with a focus and discussion on an assigned area, with a case base presentations format. Prerequisites: Current CPR certification; DAC 101, DAC 102, DHY 106, DAC 104, DHY 103, DAC 105 and DAC 110. Summer.

DHY 101. Anatomic Science For The Dental Hygienist I. 3 Credits.
This course will introduce the student to the anatomy and histology of each tooth and all structures of the oral cavity. Learning opportunities will be offered in the form of lecture and demonstration, with the aid of anatomical models and tooth models so that the student will be prepared to identify individual structures of the mouth in preparation of clinical experience. The student will draw extensively on prior learning from principles associated with anatomy and physiology. Additionally, microbiology will be taken either prior to or concurrently and provide a framework for analysis within the scope of oral hygiene, tissues, and structure. Histology and embryology of the oral tissues and face, anatomy of the head and neck, tooth morphology, development and function, and individual tooth identification and morphology of the primary and permanent dentition will be covered. This course gives the dental hygiene student basic anatomical knowledge to utilize in the clinical component of the program. Prerequisite: Admission to Dental Hygiene program, current CPR certification, BIO 203, BIO 204, ENG 101, MAT 126. Corequisite: BIO 205, DHY 102, DHY 103.

DHY 102. Dental Hygiene Process Of Care I. 5 Credits.
This course provides an introduction to the clinical experience. The student is expected to develop an understanding of sterilization, aseptic techniques, and infection control. Additionally, the student is introduced to instrumentation and the proper use of dental apparatus. Essential management techniques for dental and medical emergencies are also introduced. The student is provided with initial exposure to the culture and climate of dental hygiene practice and given beginning knowledge of how to function in such an environment. Dental Hygiene Process and Care I (Pre-Clinic) is an introduction to the practice of dental hygiene. Content is heavily focused on assessment of health, safety, risk management, and patient needs. Additionally, time will be spent on identifying instruments and their proper application. Theory and practice are combined in such a way that the student is afforded the opportunity to learn didactic material, practice and manipulate anatomical mannequins, and then synthesize this learning by using peer partners. Additionally, the student is provided with information and practice opportunities in dental and medical emergencies. In this fundamental skill course, students are introduced to the dental hygiene process through lecture and laboratory sessions. The theoretical concepts presented in lecture are expanded upon and applied in the laboratory sessions. Emphasis is placed on patient-client rationale and demonstrates proper techniques for each basic dental hygiene skill. Students must pass both laboratory and theoretical components of the course in order to continue in the program. To aid the student in the successful completion of the course, a progress report will be given to each student at the end of the eighth week of class. If any student obtains an unfavorable progress report, it becomes their responsibility to seek out their clinical instructors and/or course instructors for extra assistance. Prerequisites: Admission to Dental Hygiene program, current CPR certification, BIO 203, BIO 204, ENG 101, MAT 126. Corequisites: BIO 205, DHY 101, DHY 103.

DHY 103. Dental Radiology. 3 Credits.
This course is designed to introduce the student to the principles, theory and techniques of dental radiography. The student will become familiar with the history of dental radiographs, radiation physics, radiation hazards and protection, use of equipment, ionizing and digital processing, panoramic radiography, processing, mounting and radiographic interpretation of anatomic landmarks, including recognizing disease processes and deviations from normal anatomy. Using ADA guidelines, and ALARA principles the student will produce the highest diagnostic radiographs while exercising all the principles of radiation health and safety. Quality assurance and alternate and emerging radiographic imaging modalities are discussed. The laboratory component will focus on taking theory into practice for paralleling, bisecting, panoramic, occlusal and supplemental radiographic techniques. Upon completion of this course, the student will be able to expose, process, and mount a quality series of intraoral and extraoral radiographs to proficiency on the adult and child patient. Dental Hygiene Prerequisites: Admission to the Dental Hygiene Program, current CPR Certification, BIO 203, BIO 204, ENG 101, MAT 126. Corequisites: DHY 101, DHY 102. Dental Assisting Certificate Prerequisites: current CPR Certification, DAC 101, DAC 102, DAC 104, DHY 106. Corequisites: DAC 105, DAC 110.
DHY 105. Anatomic Science For The Dental Hygienist II. 3 Credits.
This course will provide a theoretical and practical study of the head, neck, face, and oral cavity. Included are the bones and their landmarks, nerves and their landmarks, arterial blood supply, venous drainage, temporomandibular joint, lymphatics, fascia, spaces and the spread of dental infection. Muscles of the head, neck and masticatory system will also be studied. The lymphatic system, its function, and differences in the lymphatic system in health and disease will be covered. The temporomandibular joint, jaw movements with muscle relationships, and joint disorders will be studied. Fascia, spaces, the infectious process and the spread of dental infections will also be studied. This will enable the student to integrate the knowledge of the spread of dental infection into clinical dental practice. Review of landmarks for the administration of local anesthesia will be covered in depth. The student will gain knowledge into. The student will gain knowledge into the supporting structures of the head and neck and will be able to incorporate knowledge previously acquired in Anatomic Science I for the Dental Hygienist. Prerequisite: BIO 205, DHY 101, DHY 102, DHY 103. Corequisite: DHY 106, DHY 107, DHY 108.

DHY 106. Dental Materials. 3 Credits.
This course introduces the student to various types of dental materials used in dental practices. It allows the student to begin to understand the properties of the materials and actually manipulate them and provides the foundation for current practice in dental care. These materials include restoration materials (metals/composites), impression materials, sealants, mouth guards, prosthetics, tooth whitening, and temporary restorations. The student will learn to mix and prepare the various materials used. The role of the allied dental personnel in the manipulation and application of these materials is stressed. The classroom component will introduce the student to the properties of the materials and how to mix them proportionately. Emphasis is on the section, manipulation, and clinical management of dental materials particularly from the dental hygiene and dental practice perspective. Focus will be placed on the composition, chemistry, clinical properties, mixing techniques, advantages, disadvantages and setting times of more common materials utilized in the dental setting. The relationship between the oral environment and dental materials is also examined. Lab session are integrated with lectures to provide the student with opportunities to practice various techniques such as sealants, amalgam finishing and theoretical components of the course in order to continue in the program. Students must pass both the laboratory and theoretical components of the course in order to continue in the program. Dental Hygiene Prerequisites: BIO 205, DHY 101, DHY 102, DHY 103. Corequisites: DHY 105, DHY 107, DHY 108. Dental Assisting Prerequisites: BIO 152 and MAT 126. Corequisites: DAC 101 and DAC 102.

DHY 107. Periodontology. 3 Credits.
This course introduces the student to the healthy periodontium and periodontal diseases. Included are the classifications of periodontal diseases, the oral microbiology and periodontal diseases, local contributory risk factors and systemic risk factors for periodontal diseases, host immune response, and the histopathogenesis of periodontal diseases. The student will become familiar with gingival, periodontal, and radiographic assessment of periodontal diseases. Using an evidence-based approach, along with case studies, treatment modalities will be discussed with emphasis placed on dental hygiene diagnosis, treatment planning, clinical management, and evaluation of periodontal patients. Information in this course will build upon oral anatomy, microbiology, and pre-clinical dental hygiene concepts presented in the fall semester. Prerequisites: DHY 101, DHY 102, DHY 103. Corequisites: DHY 105, DHY 106, DHY 108.

DHY 108. Dental Hygiene Process Of Care II. 6 Credits.
This course provides a progression for the student from the content learned in DHY 102 Dental Hygiene Process of Care I. The major transition lies in students beginning to treat patients rather than practicing on mannequins. Content is heavily focused on assessment of health, safety, risk management, medical emergencies, and patient needs, along with treatment planning and beginning implementation. Additional emphasis is focused on patients with special needs, nutrition, and patient education. Theory and practice are combined in such a way that the student is afforded the opportunity to learn didactic material and transfer this knowledge to work with patients in the clinic setting. Clinical experience is included on the child, adolescent and young adult patient. Prerequisite: BIO 205, DHY 101, DHY 102, DHY 103. Corequisite: DHY 105, DHY 106, DHY 107.

DHY 201. Oral Pathology. 2 Credits.
This course is an introduction to the study of oral and systemic diseases and disorders. Students will learn the principles of pathology in relation to disease of the head, teeth, soft tissues, and supporting structures of the oral cavity. It will familiarize students with the differential identification of normal oral tissues, oral lesion, and oral lesions due to systemic disease. The basis of instruction is derived from the paradigm of oral health and its juxtaposition to disease. Content will include discussion of inflammatory and immunologic process, development disorders, neoplasias, infections and diseased of the blood, bone, immune and endocrine systems. Other common pathology, such as oral cancer, leukoplakia, and nicotine stomatitis are covered in detail. As a supplement to clinical instruction, this course will provide a greater understanding of disease diagnosis, etiology, and pathogenesis. Diseases of the oral tissues and oral environs are presented with clinical features, some histopathology for explanation, course of disease(s), and treatment modalities. The purpose of this course is to instruct the student in recognition of anomalies and disease through the framework of a healthy patient. The students will be able to utilize the intraoral camera to reinforce their understanding of oral pathology. The
parameters for normal dental health are taught in order to provide the basis of identification of illness and dysfunction. Prerequisites: DHY 105, DHY 106, DHY 107, DHY 108, DHY 205, ENG 102. Corequisites: DHY 202, DHY 203, PSY 105.

**DHY 202. Pharmacology For The Dental Hygienist. 3 Credits.**

This course will address the interaction of pharmacologic agents on the body systems. This course provides students with the understanding of the pharmacological management of patients, the mechanisms of action of drugs and interactions associated with dental treatment. Drugs commonly used in dentistry and other classes of drugs, their effects on the body in care planning and treatment planning will be addressed. Emphasis is placed on mechanisms of action, common usages, side effects, implications for dental treatment and case studies. Nitrous oxide sedation will also be introduced along with the pharmacological aspects of general anesthesia. Prerequisite: DHY 105, DHY 106, DHY 107, DHY 108, DHY 205, ENG 102. Corequisite: DHY 201, DHY 203, PSY 105.

**DHY 203. Dental Hygiene Process Of Care III. 5 Credits.**

This course provides a progression for the student from content learned in DHY 108. The major transition lies in students treating patients with simple care to care of the more complex periodontal patient. Content is heavily focused on advanced instrumentation, health promotion, care planning, and treatment planning using advanced pain control techniques and medicaments for the complex periodontally involved patient. Theory and practice are combined in such a way that the student is afforded the opportunity to learn didactic material, and transfer this knowledge to work with patients in the clinic setting. This theory related practice assists the student in further developing critical thinking skills in the delivery of more complex patient care. There is an emphasis on the treatment of periodontal patients, advance dental caries and dentinal sensitivity. Total care of the patient is also expected at this point in the curriculum, utilizing a case centered approach. Lecture topics will be directed at the management of patients at different stages in the life cycle and methods for individualizing care. Students will be challenged to read, think and problem solve regarding the dental hygiene diagnosis and treatment with degrees of periodontal disease as well as other oral diseases. Prerequisite: DHY 105, DHY 106, DHY 107, DHY 108, DHY 205, ENG 102. Corequisite: DHY 201, DHY 202, PSY 105.

**DHY 205. Pain Control. 3 Credits.**

This course provides the student with the fundamentals of pain management used in dentistry. A variety of topical and local anesthetic delivery devices will be discussed and utilized. Neuroanatomy, neurophysiology and pharmacology of local anesthetics, vasoconstrictors and topical anesthetics will be covered. A thorough patient assessment including stress reduction protocol is utilized. Techniques of local anesthesia administration, including infiltration, field, and nerve blocks will be demonstrated and return demonstrations will be performed until competency is achieved. This includes injections for maxillary, mandibular, palatal and supplemental pain control. The expanded role of the dental hygienist to include administration of oral anesthetics for pain control necessitates a thorough exposure to the theory and practice of administration within the scope of dental hygiene education. This course will prepare the student to take the “Permit L” which licenses the student to administer local anesthesia in Massachusetts. Critical thinking skills, whole body patient management, local and systemic complications including emergency response to patient medical emergencies will be an integral part of the course. This course will introduce the student to utilizing pain management options in dentistry and provide basic techniques in choosing and administering anesthetics agents for pain control. Prerequisites: DHY 105, DHY 106, DHY 107, DHY 108, DHY 205, ENG 102. Corequisite: DHY 201, DHY 202, PSY 105.

**DHY 207. Dental Hygiene Process Of Care IV. 5 Credits.**

This capstone course will be offered in a hybrid online format and is a continuation of Dental Hygiene Process of Care III. Students’ progress from a didactic learning environment to a seminar discussion focused on experience. A strong knowledge base has prepared the student for an experience that transitions the role of student into one of practitioner. The student has had a level of preparation to allow for independent thinking and judgment and this is encouraged. Dental hygiene students deliver comprehensive patient care in clinic by integrating preventive education and therapeutic oral health services. The lecture portion explores such topics as Case Studies on a variety of patients to assist in the licensing board exams. Innovative dental procedures/products and topics in dental specialty practices will also be covered. Students are expected to work independently on an 8-10 page research paper that serves as a culminating experience of the students’ program and college competencies. Written communication skills will be assessed as well as the student’s ability to use advanced search techniques. An oral presentation of the paper is required. Students will also prepare an extensive case study paper demonstrating proficiency in their clinical requirements on a patient receiving dental hygiene care during the semester as well as completion of competencies from the clinical portfolio. Process of Care IV, has been identified as the capstone course, in the Dental Hygiene curriculum. It is intended to be a culminating experience for soon to graduate students from Mount Wachusett Community College, reinforcing the College’s general education competency statements. Prerequisites: DHY 201, DHY 202, DHY 203, DHY 205. Corequisites: DHY 208, SOC 103.

**DHY 208. Dental Ethics And Professional Issues. 2 Credits.**

This course prepares the student for the philosophical consideration of dental hygiene practice. The student will be exposed to a variety of case studies which exemplify ethical, legal and professional concerns. The history of dental hygiene will also be discussed as well as current practice issues such as the public health dental hygienist, omnibus bills and dental practice ramifications. Additionally, the student is exposed to membership to their professional organization, the CEU process and the State Dental Practice
Act. This course also explores the ethical and legal obligations of the Dental Hygiene professional. Content will include the major ethical theories applied in healthcare, the ethical code of the Dental Hygiene profession, and the resolution of ethical dilemmas. The student will become familiar with the legal regulation of their profession including practice acts, licensure, risk management, and quality assurance. A component of the course experience is devoted to preparing for Dental Hygiene employment and includes current professional issues, preparation of a resume and cover letter, participating in employment interviews, creating a “personal portfolio” and selecting a career position. The business of Dental Hygiene will be discussed. Career satisfaction, mobility, legal issues and liability/disability insurance will also be examined. Students will work independently and collaboratively in small groups or teams to achieve shared learning outcomes. The development of teamwork skills will assist the students in future employment. Students will also learn how to evaluate their group productivity. Students will be navigated toward the independent process of their licensing examinations. Prerequisites: DHY 201, DHY 202, DHY 203, DHY 205. Corequisites: DHY 207, SOC 103.

DHY 209. Community Oral Health. 4 Credits.
This course provides the student with the components of dental public health, community dentistry and the theory needed to design and implement sound patient education. This course will be grounded in theories of behavioral sciences and human growth and development. Students are introduced to the concepts associated with preventive community health care along with the skills needed to function within the community as an advocate of oral health and preventive care. Topics include: patient motivation, goal setting, communication skills, developing instructional objectives and sensitivity towards multi-cultural concerns. Public health issues are discussed along with epidemiology, research in education and statistical analysis. This course will examine the role of the dental hygienist as a health educator and as an oral health promoter responsible for working with patients to help them improve or maintain their oral health and wellness and also to understand the relationship between both. Additionally, it is the goal of the course to assist the student in examining their own knowledge, attitudes, values, and behaviors regarding oral health and to assist them in becoming effective health promoters to the dental hygiene patient. Clinical experiences expand to include the community, such as schools, health care agencies, veterans shelters, outreach centers and clinics. A three-hour weekly practicum experience is included. Prerequisites: DHY 201, DHY 202, DHY 203. Corequisites: DHY 207, DHY 208, SOC 103.
